The Journal of Experimental Biology

EDITED BY

V. B. WIGGLESWORTH and J. A. RAMSAY

VOLUME XXXIII

CAMBRIDGE
AT THE UNIVERSITY PRESS
1956

U OF I
LIBRARY

Published for the Company of Biologists, Limited

Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley University Printer)
and published by the Cambridge University Press

London: Bentley House, N.W. 1
American Branch: New York

Agents for Canada, India, and Pakistan: Macmillan

CONTENTS

No. 1. MARCH 1956

PAGE

PHILIP S. CORBET. Environmental factors influencing the induction and termination of diapause in the Emperor Dragonfly, *Anax imperator* Leach (Odonata: Aeshnidae) 1

M. A. SLEIGH. Metachronism and frequency of beat in the peristomial cilia of *Stentor* 15

BETTY I. ROOTS. The water relations of earthworms. II. Resistance to desiccation and immersion, and behaviour when submerged and when allowed a choice of environment 29

JAMES H. SANG. The quantitative nutritional requirements of *Drosophila melanogaster* 45

HIDEO MOHRI. Studies on the respiration of sea-urchin spermatozoa. I. The effect of 2,4-dinitrophenol and sodium azide 73

M. W. HOLDGATE and N. SEAL. The epicuticular wax layers of the pupa of *Tenebrio molitor* L. (With Plates 1 and 2) 82

M. W. HOLDGATE. Transpiration through the cuticles of some aquatic insects . 107

MASAO YOSHIDA. On the light response of the chromatophore of the sea-urchin, *Diadema setosum* (Leske) 119

S. A. BARNETT. Endothermy and ectothermy in mice at -3° C. 124

C. ELLENBY and D. A. EVANS. On the relative importance of body weight and surface area measurements for the prediction of the level of oxygen consumption of *Ligia oceanica* L. and prepupae of *Drosophila melanogaster* Meig. . 134

M. BEGG. Some observations on water-soluble factors which accelerate the growth in aseptic culture of larvae of *Drosophila melanogaster* 142

LORD ROTHSCHILD. The physiology of sea-urchin spermatozoa. Action of pH, dinitrophenol, dinitrophenol + versene, and usnic acid on O_2 uptake . . 155

BRYN M. JONES. Endocrine activity during insect embryogenesis. Function of the ventral head glands in locust embryos (*Locustana pardalina* and *Locusta migratoria*, Orthoptera). (With Plate 3) 174

G. R. FISH. Some aspects of the respiration of six species of fish from Uganda . 186

J. S. TINDAL. Glycogenolysis in the liver of the common frog, *Rana temporaria* . 196

A. N. CLEMENTS. Hormonal control of ovary development in mosquitoes . . 211

JANET E. HARKER. Factors controlling the diurnal rhythm of activity of *Periplaneta americana* L. 224

R. MORRIS. The osmoregulatory ability of the lampern (*Lampetra fluviatilis* L.) in sea water during the course of its spawning migration 235

DOREEN E. ASHHURST. Red blood-cell antigens in some lower vertebrates . . 249

No. 2. JUNE 1956

PAGE

P. M. J. Woodhead. The behaviour of minnows (*Phoxinus phoxinus* L.) in a light gradient 257

F. R. Harden Jones. The behaviour of minnows in relation to light intensity . 271

G. M. Hughes and G. A. Kerkut. Electrical activity in a slug ganglion in relation to the concentration of Locke solution 282

G. Hoyle and J. Lowy. The paradox of *Mytilus* muscle. A new interpretation . 295

R. H. Dadd. Proteolytic activity of the midgut in relation to feeding in the beetles *Tenebrio molitor* L. and *Dytiscus marginalis* L. 311

S. A. Barnett and Brenda M. Manly. Reproduction and growth of mice of three strains, after transfer to -3° C. 325

Hideo Mohri. Studies on the respiration of sea-urchin spermatozoa. II. The cytochrome oxidase activity in relation to the dilution effect . . . 330

C. R. Austin. Activation of eggs by hypothermia in rats and hamsters. (With Plates 4 and 5) 338

C. R. Austin. Effects of hypothermia and hyperthermia on fertilization in rat eggs 348

C. R. Austin and A. W. H. Braden. Early reactions of the rodent egg to spermatozoon penetration 358

G. A. Horridge. The nerves and muscles of medusae. V. Double innervation in Scyphozoa 366

Hugh Clark and Betty Florio Sisken. Nitrogenous excretion by embryos of the viviparous snake *Thamnophis s. sirtalis* (L.) 384

Anne McLaren and Donald Michie. Studies on the transfer of fertilized mouse eggs to uterine foster-mothers. I. Factors affecting the implantation and survival of native and transferred eggs 394

Otto Lowenstein. Pressure receptors in the fins of the dogfish *Scylliorhinus canicula* 417

I. G. White. The interaction between metals and chelating agents in mammalian spermatozoa 422

M. W. Hardisty. Some aspects of osmotic regulation in lampreys 431

E. G. Gray. Control of the melanophores of the minnow (*Phoxinus phoxinus* (L.)). (With Plates 6 and 7) 448

No. 3. SEPTEMBER 1956

R. B. Clark. The eyes and the photogenic behaviour of *Nephtys* (Annelida, Polychaeta) 461

B. N. Anne Hudson. The behaviour of the female mosquito in selecting water for oviposition 478

PAGE

G. A. KERKUT and B. J. R. TAYLOR. The sensitivity of the pedal ganglion of the slug to osmotic pressure changes 493

A. H. MOHAMED and O. ZAKY. Biochemical and physiological studies of the purified toxin of *Walterinnesia aegyptea* 'the Egyptian black snake' . . 502

NORMAN MILLOTT. The covering reaction of sea-urchins. I. A preliminary account of covering in the tropical echinoid *Lytechinus variegatus* (Lamarck), and its relation to light 508

J. M. MITCHISON. The mechanical properties of the cell surface. IV. The effect of chemical agents and of changes in pH on the unfertilized sea-urchin egg 524

S. BAINES. The role of the symbiotic bacteria in the nutrition of *Rhodnius prolixus* (Hemiptera) 533

REUBEN LASKER and ARTHUR C. GIESE. Cellulose digestion by the silverfish *Ctenolepisma lineata* 542

H. KALMUS. Sun navigation of *Apis mellifica* L. in the southern hemisphere . 554

ROGER LAUGHLIN. Storage and utilization of reserves by the garden chafer, *Phyllopertha horticola* L. 566

J. L. CLOUDSLEY-THOMPSON. Studies in diurnal rhythms. VII. Humidity responses and nocturnal activity in woodlice (Isopoda) 576

E. N. WILLMER. Factors which influence the acquisition of flagella by the amoeba, *Naegleria gruberi* 583

G. A. HORRIDGE. The responses of *Heteroxenia* (Alcyonaria) to stimulation and to some inorganic ions 604

K. H. MANN. A study of the oxygen consumption of five species of leech . . 615

No. 4. DECEMBER 1956

SMILJA MUČIBABIĆ. Some aspects of the growth of single and mixed populations of flagellates and ciliates. The effect of temperature on the growth of *Chilomonas paramecium*. (With Plate 8) 627

B. M. SHAFFER. Acrasin, the chemotactic agent in cellular slime moulds . . 645

J. W. S. PRINGLE. Proprioception in *Limulus*. (With Plate 9) 658

TORKEL WEIS-FOGH. Tetanic force and shortening in locust flight muscle . . 668

BRYN M. JONES. Endocrine activity during insect embryogenesis. Control of events in development following the embryonic moult (*Locusta migratoria* and *Locustana pardalina*, Orthoptera). (With Plate 10) 685

J. A. RAMSAY. Excretion by the Malpighian tubules of the stick insect, *Dixippus morosus* (Orthoptera, Phasmidae): calcium, magnesium, chloride, phosphate and hydrogen ions 697

J. Z. YOUNG. Visual responses by optopus to crabs and other figures before and after training 709

PAGE

B. Lofts. The effects of salinity changes on the respiratory rate of the prawn *Palaemonetes varians* (Leach) 730

A. R. Mead-Briggs. The effect of temperature upon the permeability to water of arthropod cuticles 737

W. H. Thorpe and R. A. Hinde. An inexpensive type of sound-proof room suitable for zoological research 750

P. T. Haskell. Hearing in certain Orthoptera. I. Physiology of sound receptors 756

P. T. Haskell. Hearing in certain Orthoptera. II. The nature of the response of certain receptors to natural and imitation stridulation 767

Phyllis M. Harlow. A study of ovarial development and its relation to adult nutrition in the blowfly *Protophormia terrae-novae* (R.D.) 777

R. W. Murray. The thermal sensitivity of the lateralis organs of *Xenopus* . . . 798
